A Flower City SPECIALTY

French Hybrid LILACS

THE EXPERTS SELECT THE BEST 12 FROM HIGHLAND PARK

EDITH CAVELL. A very fine double white, the highest rated of the color.

EMILE GENTIL. Double; very blue; late.

KATHERINE HAVEMEYER. Flowers large, double, lilac, in large, compact clusters. A splendid variety.

LUCIE BALTET. Single flowers almost flesh-pink or coral-pink.

MACROSTACHYA. Very fine light pink single; immense panicles.

MONGE. Single; mauve-red. Clusters huge, well filled.

MRS. W. E. MARSHALL. Long, well filled spikes of single, deep purplish red flowers that retain their rich coloring unusually well. A charming garden aristocrat.

PAUL HARIOT. Fragrant, double, purple with silvery reflex.

PAUL THIRION. Double. Buds claret-red. Blossoms carmine. When partially open, trusses resemble clusters of tiny rosebuds.

PRESIDENT LINCOLN. Flowers single. Wedgewood-blue in color, the nearest to a true blue.

VESTALE. Enormous clusters of large, pure white, single flowers with conspicuous yellow anthers. Handsomest of the single whites.

VICTOR LEMOINE. Florets very double. Panicles the largest, lilac in color, the general effect is a soft rosy pink overlaid with a delicate blue-lavender.

EUONYMUS VEGE-TUS (Evergreen Bittersweet). A lovely evergreen climbing vine, with an abundance of leathery foliage of deepest green; berries of orange and creamy color grace it in early fall. **Price:** 12- to 15-inch spread, B&B, \$2.00 each.

SILVER LACE VINE (*Polygonum Auberti*). A fast growing vine; delicate foliage and quantities of silver-white flowers for midsummer enjoyment. **Price:** 2-yr. plants, \$1.00 each; 3 for \$2.75.

BOSTON IVY. Glossy foliage, turning to a brilliant orange-scarlet in the fall; wonderful for chimneys, stone or brick walls. **Price:** 2-yr. plants, 75c each; 3 for \$2.10.

GREEN-LEAVED BARBERRY. 4 feet. A popular variety, the foliage turns a bright orange-scarlet in the fall. Large masses of fire-red berries last into the winter. **Price:** 15 to 18 in., 50c each; 10 for \$4.50; 100 for \$40.00.

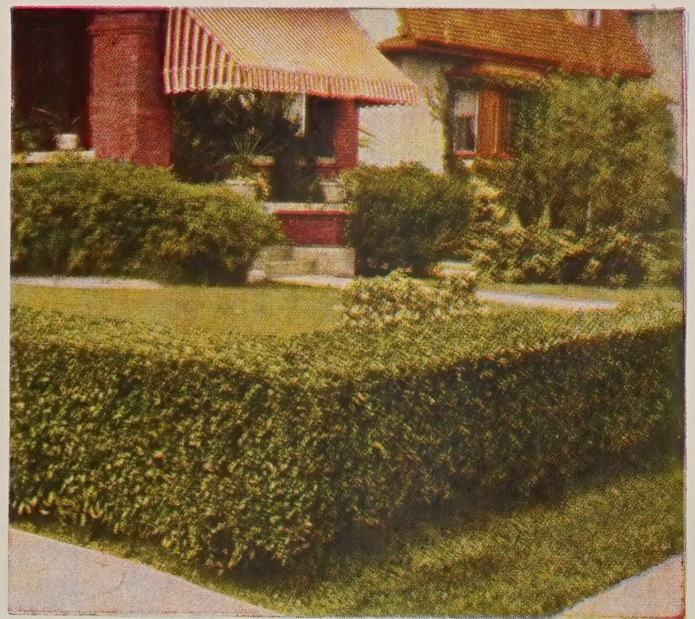

Privets for Either Severe or Informal Effects

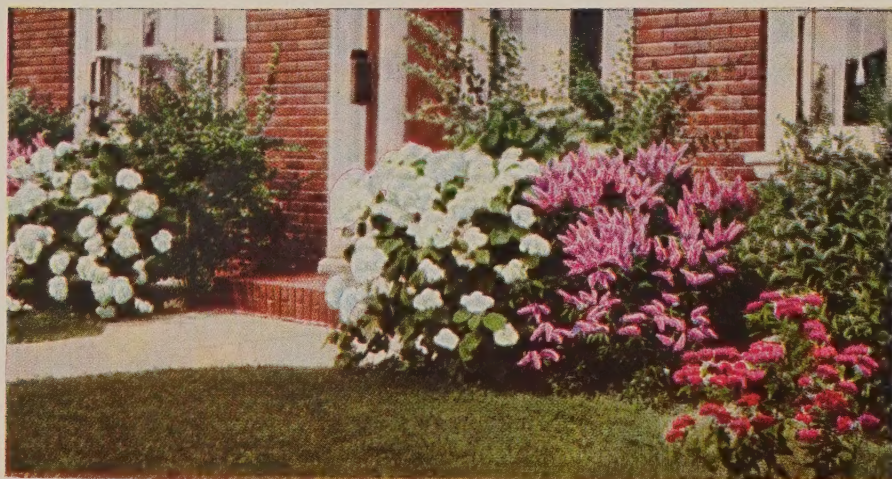

AMUR PRIVET. While this plant will make a large shrub, it is usually grown in hedge form. The plant in general is very similar to the extensively used California Privet, but has the added advantage of being thoroughly hardy.

CALIFORNIA PRIVET. Vigorous plant, mostly used for hedges. Holds leaves until well into fall. In especially severe winters, this variety will freeze to the ground, throwing up new growth from the base of the plant. Can be trimmed to any height up to 12 feet.

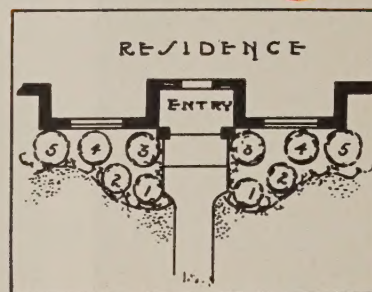

PRICES: 18 to 24 in. plants, 10 for \$2.00; 25 for \$4.50; 100 for \$15.00.

BLUEBERRIES

This is a berry which has created a lot of favorable attention these past few years. An unusually large bearer, the berries often range in size from $\frac{1}{2}$ to $\frac{3}{4}$ inch.

With some protection, where the thermometer drops more than 10 degrees below zero, they can be grown almost anywhere that the soil is acid. Plant two or more varieties to insure pollination.

RUBEL RANCOCAS JERSEY

Price: 18 to 24 in. plants, \$1.85 each; 5 for \$7.95; 10 for \$13.50.

Dwarf Apple Trees

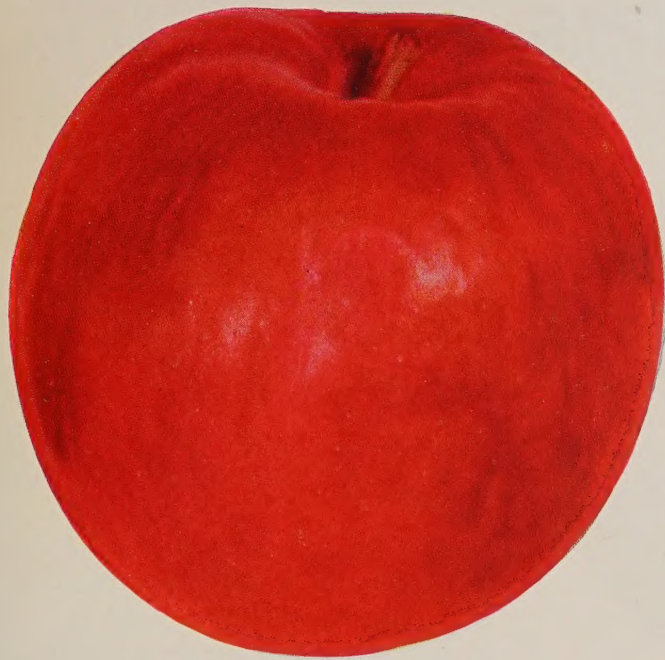

No matter how select your garden may be, there is always room for one or two dwarf fruit trees; the little miss in the illustration, who is two years old, gives you an idea of the height of one of these trees the same age. High productivity for small areas. They produce standard size Apples.

LIVING FENCES-BY THE MILE

You'll Find the Multiflora Rose a Natural for Conservation, Farming—
Stock-Proof, Hardy and Surprisingly Well Behaved

The Wild Rose—A Living Farm Fence

Rosa Multiflora Japonica—Thorny Type

This Asiatic, commonly called Multiflora Rose, has in the past decade proven very efficient in control of soil and wind erosion, for livestock fencing and for natural cover for both game and song birds.

Multiflora makes one of the least expensive types of fence. 1000 plants set 1 foot apart will make 1000 feet of solid fence in three or four years. At a cost of \$65.00 per thousand these plants make it possible to permanently enclose a field at the exceedingly low figure of 6½ cents per running foot. Most wire fencing and posts will cost at least twice this amount for materials and even the cost of planting 1000 feet is less than setting posts and stretching fence. Spacing even as wide as four feet has been found perfectly satisfactory if time is not a factor. Two men can easily plant 1000 Multiflora in less than half a day.

Ideal hedge, screen material, and snow fence for country estates, cemeteries, and golf clubs, but not recommended for small suburban properties. Ultimate height and width 8 to 12 feet
